## ABOUT ME

B.Tech Electronics & Communication Engineering student with hands-on experience in web development, robotics, and software development. Skilled in Python, JavaScript, React, Git, and GitHub with a strong foundation in problem solving and data structures. Passionate about building scalable applications and learning modern software engineering practices. Seeking internship and apprenticeship opportunities in software development and technology.

## EDUCATION

### PRANVEER SINGH INSTITUTE OF TECHNOLOGY 2023-2027

- Pursuing a Bachelor of Technology in Electronics and Communication Engineering.
- Gaining knowledge in electronics, communication systems, programming, and emerging technologies.

### DR. VIRENDRA SWARUP PUBLIC SCHOOL 2021-2023

- Completed higher secondary education with a focus on science subjects.
- Developed analytical thinking and a strong academic foundation for engineering studies.

## PROJECTS

### Hand gesture-controlled car

- Developed a gesture-controlled robotic car using the MPU6050 sensor to detect hand movements for wireless directional control.
- Enabled real-time communication with nRF24L01 RF modules and integrated obstacle detection with automatic LED headlights for safer navigation.

### News App

- Developed a responsive news application using React.js that fetches real-time news articles from a News API.
- Implemented category-based news browsing (Business, Sports, Technology, Entertainment, etc.).
- Added infinite scrolling and loading indicators to enhance user experience and performance.

## CERTIFICATIONS
